Mt. View, California

Mr. McKinnon
Director of Public Works

Dear Sir:

I am the owner of the property located at 74 Devonshire, Mt. View. A sewage situation exists there which I consider important enough to bring to your attention.

There is a septic tank on the property which services the present tenants in two living units. Since I purchased the property, approximately 1 year ago, the tenants have constantly complained that the septic tank continually overflows and is causing not only a very unpleasant odor, but more importantly, creating a very real health hazard.

I have had the septic tank pumped out, but this has not solved the problem; the waste material continues to rise to the surface.

I fully realize that the sewer now in the process of being constructed will be ready for use by August of this year, however, due to the existing condition of the septic tank, I am wondering if it would be possible to hook up the sewer at 74 Devonshire before August.

I would appreciate hearing from you as soon as possible. I can be reached by phone at 341-8221.
